

I Can Statement - Year 6 Maths

Topic Overview Fractions A	Pre-taught Vocabulary	
This maths unit teaches us how to work confidently with different types of fractions. First, we will learn how to simplify fractions and find equivalent ones using number lines. After that, we are going to compare and order them by looking closely at both the numerators and the denominators. Next, we will practise adding and subtracting simple fractions before moving on to trickier ones. Finally, we will master how to add and subtract mixed numbers to complete our learning.	Fraction	Numerator
	Denominator	Equivalent
	Simplify	Compare
	Mixed number	Improper fraction

RAG Rating:		Start	End	Teacher
1.	I can find equivalent fractions.			
2.	I can simplify fractions.			
3.	I can compare and order fractions.			
3.	I can add and subtract two fractions with denominators that are multiples of the same number.			
4.	I can add and subtract any two fractions.			
5.	I can add and subtract mixed numbers.			
6.	I can solve problems relating to addition and subtraction of fractions.
