

I Can Statement - Year 6 Maths

Topic Overview Fractions B	Pre-taught Vocabulary	
In this topic, we are going to build our confidence and master how to multiply and divide fractions. First, we will learn the formal steps to multiply fractions together, as well as how to multiply them by whole numbers, which we call integers. Next, we will challenge ourselves by dividing different fractions by integers to see exactly how the pieces change size. After tackling some mixed problem-solving questions to test our progress, we will practice finding the fraction of a specific amount. Finally, we will learn how to work backwards to find the original whole amount, completing our fraction journey.	Fraction	Integer
	Numerator	Denominator
	Improper Fraction	Mixed Number
	Simplify	The Whole

RAG Rating:		Start	End	Teacher
1.	I can multiply a fraction by an integer			
2.	I can multiply a fraction by a fraction.			
3.	I can divide any fraction by an integer.			
3.	I can find fractions of amounts.			
4.	If I have a fraction of an amount, I can find the whole.			
5.	I can solve problems relating to fractions.
